SUMMARY & SKILLS

Senior UI developer with 7+ years experience and specialization in Web app development. Designed applications that increased user satisfaction by 20% and resolved persistent browser compatibility issues for Firefox users whilst rigorously adhering to project deadlines. Looking to leverage my skills to produce seamless and profitable UI for Travvise Technologies.

FEW STRONG POINTS FROM MY SKILL SET-:

- Hands on experience in HTML5 , CSS3, Bootstrap, Tailwind.
- Hands on experience in Responsive Design and Media Queries.
- working with developers for resolving front end and CSS issues
- working in different technology environments like .NET, Windows, PHP, Wordpress.
- Proficiency in Adobe Creative Suit - Specifically Figma, Photoshop, Indesign, Adobe XD, Illustrator, Corel draw.
- Experience in working with Java script , JQuery, Angular and React.
- A thorough understanding of Cross-Browser/Cross Platform Web Development
- Experience in working with MVC Framework environment.

EXPERIENCE

Travvise Technologies Doha Qatar (Oct 2022 - Present)

UI/UX Developer

- **Translate Design into Angular Components:** Convert the Figma design into Angular components, including templates, styles, and logic, ensuring alignment with UX/UI specifications.
- **Integrate with Angular Features:** Integrate Angular features such as data binding, directives, and services to enhance user interactions and dynamic content delivery.
- **Optimize Performance and Maintainability:** Implement best practices in Angular development to optimize performance and maintainability, including efficient code structure, lazy loading, and code splitting.
- **Collaborate with Designers and Backend Developers:** Collaborate closely with UX/UI designers to ensure accurate implementation of design elements and with backend developers to integrate front-end component
- **Responsive Design:** Implement responsive design techniques to ensure the webpage looks and functions well on different screen sizes and devices.
- **Style with SCSS:** Translate the visual styles from Figma into CSS code to apply colors, fonts, spacing, and other design properties to the HTML elements.
- **Create HTML Structure:** Write HTML code to represent the structure of the webpage, including containers, sections, headers, footers, and other elements.
